

Aditya Pun

Gameplay and Tools Programmer

adipun.github.io | adityapun11@gmail.com | linkedin.com/in/adipun

ABOUT ME

Gameplay & Tools Programmer (Distinction, Level 7 Apprenticeship) with commercial AAA studio experience at Sumo Digital. Experienced in C++ gameplay systems, engine tools, and console development. Focused on clean architecture, performance optimisation, and shipping production-ready features.

EDUCATION

Game Programmer Apprenticeship - Distinction

Sumo Digital . 2024 - 2025

Python Data Science Course

HyperionDev . 2023

Chemistry BSc (Hons)

University of Leicester . 2015 - 2019

EXPERIENCE

Junior Programmer

Sumo Digital | **October 2023 - July 2025**

- Developed real-time gameplay and engine features in C++ (Unreal + in-house engines) for commercial projects.
- Implemented PS4 trophies, metadata, and platform integration in compliance with Sony TCR requirements.
- Built internal Python tools (Tkinter + JSON validation) to streamline content authoring workflows.
- Wrote custom HLSL shaders including CRT simulation (chromatic aberration, scanlines, pixelation).
- Designed data-driven building and progression systems with JSON/CSV serialization and dependency injection for testability.
- Optimised CPU/GPU performance using PIX, RenderDoc and Visual Studio Profiler.
- Collaborated in cross-discipline Agile teams to deliver milestone features.

PCR Laboratory Scientist & Technical Trainer

Rosalind Franklin Laboratory / UKHSA | **July 2021 - March 2023**

- Operated automated liquid handling robotics in a sterile, regulated environment (Containment Level 3 laboratory, ISO 35001).
- Processed 1,000+ COVID-19 tests daily, maintaining accuracy and adherence to strict quality standards.
- Trained 20+ team members on virus inactivation, sample handling (automated/manual pipetting), and quality control protocols; everyone passed compliance tests.

TECHNICAL SKILLS

- **Languages:** C++, C#, Python, HLSL
- **Engines:** Unreal Engine, Unity, custom in-house engines
- **Graphics & Rendering:** Shader programming, 2D/3D maths, forward/deferred rendering
- **Profiling & Optimisation:** PIX, RenderDoc, Visual Studio Profiler
- **Data & Tools:** JSON/CSV pipelines, CMake, Python tooling, SQLite
- **Version Control & Workflow:** Git, Perforce, Agile (SCRUM), code reviews
- **Soft Skills:** Clear communicator, collaborative team member, strong ownership and problem-solving mindset.

CREDITS

Programmer

- NUTMEG! A Nostalgic Deckbuilding
- Football Manager
- Snake Party

QA tester

- Still Wakes the Deep
- Oil Strike '75

INTERESTS

- Game development & systems design
- Boulderling & hiking
- Board games & D&D
